

Svecia Feeding Master SFM

Model
10x14 / 16x33

The Svecia Feeding Master is an automatic single sheet or stream feeder, designed for the industrial screen printer and available as fixed or detachable unit.

The separator heads are placed at the rear end of the pile and can handle almost every substrate in the industry.

A powerful air cushion assures the material to float onto the feeding table in an easy and reliable way.

The feeder is either controlled by its LCD operator panel or alternatively as inline unit, from the main control panel at the printing machines.

STANDARD EQUIPMENT

- PLC controls with integration to SAMX
- LCD touch panel for easy settings
- Motorized positioning of rear separator head carrier bar
- Front pile loading
- Choice between single and stream sheet feeding
- Pile height control
- Motorized pile side adjustment
- Smother frame (gate with wheels over the feed board)

OPTIONS

- Vacuum feed board
- Detachable execution on trolley, to allow manual feeding of short job runs.
- Detachable execution on motorized trolley.
- Pile support plate for floor integration, for heavy pallet loading.
